[Derwent](#)Title: **JP4296138A2: ELECTRONIC MAIL SYSTEM**Country: **JP Japan**Kind: **A**Inventor: **..AYASHI FUMIO;**Assignee: **OMRON CORP**[News, Profiles, Stocks and More about this company](#)Published / Filed: **.392-10-20 / 1991-03-25**Application Number: **JP1991000060567**IPC Code: **H04L 12/54; H04L 12/58; G06F 11/34;**Priority Number: **.391-03-25 JP1991000060567**

Abstract:

PURPOSE: To detect quickly the occurrence of a communication fault in the electronic mail system and to analyze properly a cause to the communication fault.

CONSTITUTION: Trace information in the case of electronic mail communication using a broad network 60 is stored in gateways 11, 21, 31, 41 through which the information passes and when the electronic mail communication is normally received by a recipient, the trace information is deleted by reception acknowledge information from the recipient. However, when the trace information is not deleted within a prescribed time, it is discriminated as the occurrence of a communication fault and the trace information is sent to a management terminal equipment 50 via the broad network 60.
